

FORTINET®

SPOTNET

Transform your Network Operations

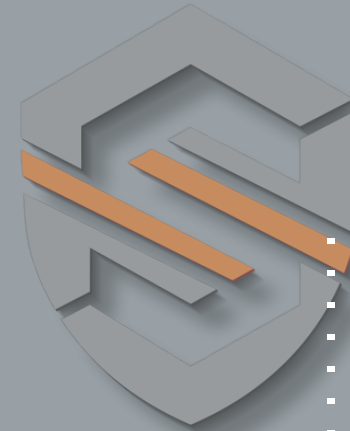

Step into the Platform Era with
Managed FortiGate Service

Managed FortiGate Service

24x7 cloud based network operations solution, powered by Fortinet experts, to simplify and optimize your network infrastructure according to Fortinet security best practices and ITIL methodologies.

Benefits

Device Provisioning

Streamline the deployment of FortiGate devices making them ready to protect your infrastructure, adhere to security standards and improve efficiency.

Change Management

Leverage FSBP and ITIL methodologies to ensure configuration changes are evaluated, implemented and verified to maximize performance and uptime of your network.

System Hardening

Get immediate expert response and resolution to security incident, identify configuration weaknesses and implement proactive measures to improve your security posture.
